

A patented fountain of youth for the cellular powerhouse!

The Anti-Aging & Energy Formula has been proven in clinical tests to be revolutionary in its ability to enhance mitochondrial function and improve the efficiency of energy production in the body. This cutting-edge supplement was awarded a Government Patent on its merits and on the results of these tests.

There is extensive scientific support that mitochondrial function declines with age, starting as early as our 20's.

A leading theory on aging, the mitochondrial clock theory, is based upon a gradual decline in mitochondrial function because of DNA damage from free radicals.

This patented product combines two mitochondrial metabolites and two mitochondrial respiratory chain precursors that enhance mitochondrial function. In animal and human studies, these metabolites increase mitochondrial functions, enhance energy production and counteract some of the biochemical reactions associated with aging.

Special Features:

Alpha lipoic acid, a key ingredient of this formula, serves to enhance mitochondrial function, support better hearing, and has been used as a therapeutic agent in liver and brain disorders.

Acetyl L-carnitine is a biological compound also found in the formula which stimulates antioxidant defenses.

Coenzyme Q10 and **Glutathione** are the other key ingredients that make this formula unique, helping to effectively battle free radicals on a cellular level. The ability to slow the process of aging on a cellular level is what sets this product apart from the rest and is the reason it has produced so many remarkable success stories.

Scientifically developed and patented formula slows cell aging†

Supports increased memory and energy

Vi-pak® Anti-Aging and Energy Supplements are helping lead the way to healthier living.

SUPPLEMENT FACTS

Serving size: 1 Capsule

Ingredient	Amount	% Daily Value
Acetyl-L-Carnitine	600 mg	*
Alpha Lipoic Acid	150 mg	*
L-Glutathione	30 mg	*
Coenzyme Q-10	10 mg	*

Other Ingredients: Rice Powder, Magnesium Stearate, Silicon Dioxide and kosher vegetable capsule (hydroxypropyl methylcellulose, sorbitol, silicon dioxide and purified water).

Guarantee: These supplements are made with the finest scientific and natural ingredients. None of our supplements contain any yeast, preservatives, artificial flavoring, wheat, corn or milk.

†Based on institutionally funded research by Dr. Michael Seidman resulting in a patented supplement proven to slow the cellular aging process at a mitochondrial level. U.S. Patent #5,977,162

Note: Keep out of reach of children. Store in a cool, dry place.

Directions: Take one capsule with a glass of water every day. For optimal results, use for at least 90 consecutive days and combine with proper diet and exercise.

*Daily value not yet established.

Healthy vs. Unhealthy Mitochondria

Unhealthy Mitochondria

Unhealthy cell becoming apoptotic; disintegrating as the mitochondria order the cell to self-destruct.

Healthy Mitochondria

Artist Rendering

Vi-pak is shown to help improve mitochondrial health and may delay onset of apoptosis.*
